EDUCATION

Bachelor of Computer Science, Bina Nusantara University (Sept 2019 - Apr 2023)
GPA: 3.95/4.00

WORK EXPERIENCES

Software Engineer 2, Mekari (Jan 2025 – Present)

- Contributed to a major backend migration from PHP Laravel to Golang, which resulted in a >50% reduction in API response time.
- Led the end-to-end development of a new key feature for the Performance Management module, acting as the Person in Charge (PIC) from technical design through to deployment.
- Engineered and maintained robust, scalable backend systems using Golang, while also contributing to the Vue.js frontend to ensure seamless feature delivery.
- Built UI automation tests using Playwright to reduce the team's manual testing workload.
- Accelerated development cycles by leveraging AI-powered tools (GitHub Copilot) for code optimization and rapid prototyping.

Associate Software Development Engineer, Blibli (Apr 2023 – Des 2024)

- Successfully migrated multiple large-scale projects from Vue 2 to Vue 3 with TypeScript, enhancing application performance and maintainability.
- Engineered critical seller account security features, including Multi-Factor Authentication (MFA), Phone Verification, and Account Deletion.
- Led the front-end execution for the platform-wide rebranding of Blibli Seller Center and developed a new centralized checkout & payment page.
- Strengthened code quality and application stability by implementing a robust testing suite with Jest/Vitest for unit tests and Playwright for integration tests.

Software Development Engineer Intern, Blibli (Feb 2022 – Feb 2023)

- Engineered and maintained a suite of features for the Official Store platform using Vue.js and TypeScript, including the contract request & renewal system, a customizable Store Layout, Broadcast Chat, the Official Store Landing Page, and the Seller Favorite Page.
- Improved application stability by writing comprehensive unit tests with Jest for all new components and features.

ORGANIZATIONAL EXPERIENCES

Manager of Information Technology, Bina Nusantara English Club (Mar 2021 – Jan 2022)

- Led and mentored a team of four staff members, fostering their technical skill development through regular, hands-on training sessions.
- Spearheaded the complete redesign of the organization's main website and developed a new member services site (Classes & Benefits) from concept to completion.
- Provided technical supervision for the Asian English Olympics event website, guiding the project team with critical feedback to ensure a successful launch.

Staff of Information Technology, Bina Nusantara English Club (Mar 2020 – Feb 2021)

- Co-developed the Laravel-based registration system for the Asian English Olympics and other social events, and provided critical bug-fixing support during the live events.

SKILLS

Languages: Indonesian, English

Technologies: HTML, CSS, JavaScript, TypeScript, React.js, Vue.js, Next.js, PHP (Laravel), Golang, SQL, Jest, Vitest, Playwright, Git, GitHub Copilot
